ZET Storing System

Product Type

Storing System

Production Process

The frame is made from welded steel rods, available in a black powder-coated or chrome-plated finish. The shelves are MDF core with either a black painted oak or lacquered smoked oak veneer.

Environment

Indoor

ZET is a smart shelving system with a light, airy, and minimalistic appearance. The whole system consists of two components only: the wooden u-shaped shelves and the metal frame construction. By assembling those two parts, you are able to build several different formations in order to achieve the expression you prefer – right now and going forward. ZET is produced in high quality materials and the stabilising system provides a firm stability. The design is easily assembled and can be changed and remodelled whenever you want.

About the Designer

Florian Kallus and Sebastian Schneider founded Kaschkasch in 2011. The German designer duo always strives to get the maximum out of the minimum by breaking every idea down to its essential elements. Every piece of their work has a little something to discover – something that speaks of the designers' love for details.
